DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-10, drawn to an ultra-violet lamp mounted to a reflector/shield having an inner surface to reflect a portion of ultra-violet radiation emitted by the lamp, classified in class 250, subclass 504R.

II. Claims 11-17, drawn to a supporting plate mounted to a mounting plate pivoting between a non securing position and a securing position, classified in class 250, subclass 504R.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the difference of the inventions is the reflector and the supporting plate having the different functions or different effects.
